PROFESSIONAL SUMMARY

Android Developer with 2 years of experience developing and maintaining native Android applications using Kotlin, Android SDK, and XML layouts. Experienced in REST API integration, application debugging, and feature development across multi-service, e-commerce, classified marketplace, and property rental platforms. Currently implementing modern Android UI using Jetpack Compose alongside existing XML-based interfaces. Skilled in troubleshooting application issues, integrating backend services, and enhancing application functionality and user experience.

TECHNICAL SKILLS

Programming Languages	Kotlin, Java
Android Platform	Android SDK, Android Studio, Android Jetpack, Android Architecture Components
UI Development	Jetpack Compose, Material Design 3, XML Layouts, RecyclerView, ViewPager2, ConstraintLayout, Navigation Component
Architecture Patterns	MVVM, Repository Pattern, Dependency Injection
Jetpack Components	ViewModel, LiveData, StateFlow, SharedFlow, Kotlin Flow, WorkManager, Lifecycle, View Binding, Data Binding
Asynchronous Programming	Kotlin Coroutines, Structured Concurrency, Flow Operators
Networking & APIs	Retrofit, OkHttp, REST APIs, JSON, Gson, Apollo GraphQL
Dependency Injection	Dagger 2, Hilt
Local Storage	Room Database, SharedPreferences, DataStore
Background Processing	WorkManager, Coroutine Dispatchers, Background Tasks
Firebase Services	Firebase Cloud Messaging (FCM), Firebase Crashlytics, Firebase Analytics
Third-Party SDK Integration	Google Sign-In, Payment Gateway SDKs, Agora SDK
Build & Development Tools	Gradle, Android Debug Bridge (ADB), Logcat, Git, GitHub
App Publishing & Debugging	Android App Bundles (AAB), APK Generation, ProGuard/R8, Crash Analysis, Performance Optimization

PROFESSIONAL EXPERIENCE

Android Developer Sep 2024 – Present

Trioangle Mind Technology, Madurai, India (2 Years)

- Develop and maintain native Android applications using Kotlin and Android SDK across multiple business domains.
- Implement modern Android UI screens using Jetpack Compose in service-based projects while maintaining existing XML-based interfaces.
- Build reusable UI components and implement interactive layouts using declarative UI principles.
- Integrate REST APIs and GraphQL services to retrieve, process, and display dynamic application data.
- Develop new features, enhance existing functionality, and resolve application defects.
- Debug application crashes, API integration errors, and UI-related issues using Android Studio debugging tools.
- Maintain existing codebases and improve application stability, functionality, and user experience.
- Collaborate with backend developers and QA engineers to deliver features and resolve technical issues.

PROJECT EXPERIENCE

GoferJek X – Multi-Service Platform

Technology: Kotlin, Android SDK, XML, REST APIs

Google Play: GoferJek X | GoferJek – Service Provider X | GoferJek–Store Restaurant X

- Worked on Android applications for users, service providers, and store owners.
- Developed and maintained features related to ride booking, delivery services, service requests, and order management.
- Integrated REST APIs for booking workflows, trip management, order updates, and user account information.
- Implemented UI enhancements, fixed application crashes, and resolved API integration issues.

Cliqbuy shop – E-commerce Application

Technology: Kotlin, Android SDK, XML, REST APIs

Google Play: Cliqbuy shop

- Developed and maintained Android features for an online shopping application.
- Worked on product listings, product details, shopping cart, and order-related workflows.
- Integrated REST APIs to retrieve product information and synchronize application data with backend services.
- Resolved functional issues and enhanced application usability and reliability.

Passup – Classified Marketplace

Technology: Kotlin, Android SDK, XML, Apollo GraphQL

Google Play: Passup

- Developed and maintained Android features for a marketplace that enables users to buy and sell products.
- Implemented marketplace UI components and product listing-related workflows.
- Integrated GraphQL APIs to retrieve and manage application data.
- Fixed bugs and improved application functionality and user experience.

Makent X – Property Rental Platform

Technology: Kotlin, Android SDK, XML, REST APIs

Google Play: Makent X

- Developed and maintained Android features for a property rental and booking platform.
- Worked on property listings, property details, search functionality, and booking-related workflows.
- Integrated REST APIs for property information retrieval and backend communication.
- Resolved application issues and enhanced UI functionality and application stability.

ADDITIONAL EXPERIENCE

Associate Trainee Engineer (Network Support) — Jan 2023 – Sep 2023

CMS IT Services

- Monitored enterprise network infrastructure, managed Meraki devices, and handled Jira incident/SLA workflows.

EDUCATION

B.E. – Computer Science & Engineering — Graduated 2022

Sethu Institute of Technology, Tamil Nadu, India (Full-Time)
